

# 45B's Design Centre to support Cardano projects - MS1 Report

This document will transcribe the original Proof of Achievement and extend the Acceptance Criteria section with images for any externally hosted content like videos and images.

## 1. Output: Establishing a knowledge base;

**Acceptance criteria:** Create an online space (with minimal initial content outline) where we can later gather knowledge about UI/UX and Design - a root "menu" of "content titles" (but no actual content) outlining the topics we want to cover and how to organize it for the viewer;

**Evidence:** <https://design.45b.io/docs/intro>

## 2. Output: Raising awareness to the initiative;

**Acceptance criteria:** At least one main post has been made on X (with at least 100 views and 10 retweets);

45B - Cardano Enablement

@45B\_Cardano

We're excited to invite project owners, builders and designers to come launch this initiative!

We'll be hosting two X spaces and a Google meet (times and links in Luma)

Pls share it with anyone who may be interested!

The image shows a Luma event card. On the left, it says 'luma+' and '45B's Cardano Design Centre: Project Launch' with an 'RSVP' button. On the right, there is a 45B logo with the text 'CARDANO ENABLEMENT Learn | Manage | Build'. Below the logo, it says 'Cardano Design Centre to support Projects' followed by a bulleted list: '• UI/UX, Design, Product management, ...', '• Spaces + Calls to discuss and network', '• Resources portal to share knowledge', '• Interventions in batches of projects', and '• TAKING SIGN-UPS!'. At the bottom of the card, it says '45B's Cardano Design Centre: Project Launch · Luma'.
